COURSES AND OTHER EDUCATIONAL ACTIVITIES

Principles of Microeconomics, ECONOM 1014, University of Missouri

A broad survey of microeconomics, from the basic market model and its many applications to market failures and policy responses. Topics include potential tradeoffs between efficiency and equity in competition and trade policy; determinants of wage differentials, poverty and inequality; and evaluation of the benefits and costs of government interventions in markets.

Role: In-person instructor

Student number: Two sections of 300 students each, 600 total for Fall semester 2025.

Principles of Microeconomics, ECONOM 1014, University of Missouri

A broad survey of microeconomics, from the basic market model and its many applications to market failures and policy responses. Topics include potential tradeoffs between efficiency and equity in competition and trade policy; determinants of wage differentials, poverty and inequality; and evaluation of the benefits and costs of government interventions in markets.

Role: Virtual instructor

Student number: 40 during Summer 2024 and Summer 2025, 90 during Fall 2024 and Spring 2025.
